(54) ELECTRONIC STILL CAMERA

(57)Abstract:

PROBLEM TO BE SOLVED: To attain panorama photographing by displaying a contour image of a picture being a source of panorama synthesis so as to photographing an object while confirming an overlap area with that of an adjacent picture.

SOLUTION: A panorama picture is generated by using a moving state detection means 112 that detects a moving state of the electronic still camera in a photographing state, a means 109 that extracts a contour of the picture obtained through photographing to display an extracted contour picture on a display section, and a means that forms background of the extracted contour picture for a transparent area, synthesizes a monitor object image photographed for panorama synthesis with the area and displays the synthesized picture on the display section.

LEGAL STATUS

[Date of request for examination]

[Date of sending the examiner's decision of rejection]

[Kind of final disposal of application other than the examiner's decision of rejection or application converted registration]

[Date of final disposal for application]

[Patent number]

[Date of registration]

[Number of appeal against examiner's decision
of rejection]

[Date of requesting appeal against examiner's
decision of rejection]
